

Comfort and freshness, in every pair.

Try them. Feel the difference.

Confidence in your shoes, and when they come off.

Foot odor can make you feel uncomfortable, even in a great pair of shoes. SHINURBON brings together odor control and walking comfort. DEOFIT functional fabric and four complementary layers help keep your steps fresh and comfortable throughout the day.

SHINURBON: top and bottom

DEOFIT TECHNOLOGY

Freshness starts with the fabric

We blend our proprietary odor-reducing and antibacterial powder with silicone ink and screen-print it onto fabric. This functional fabric forms the top layer in contact with the foot to help reduce odor-causing substances. The silicone pattern also helps reduce foot slippage.

Made in Korea. From the functional fabric to the four-layer structure, SHINURBON is designed for fresh, comfortable steps.

01 DEOFIT Odor Control

Functional fabric helps reduce odor-causing substances and keep shoes fresh. Instead of masking odors with fragrance, SHINURBON focuses on their source.

02 Antibacterial Protection

Shoes remain in contact with your feet for hours. DEOFIT helps inhibit bacterial growth for a more hygienic environment inside your shoes.

03 A Stable Fit in Motion

Slipping inside your shoes can be uncomfortable when walking or exercising. SHINURBON helps reduce foot slippage for a stable fit, so you can focus on moving.

04 Resilience for Lasting Comfort

G-10 Fran high-resilience foam recovers after compression. Its durability helps reduce compression and deformation, even during extended wear.

05 Targeted Pads & Heel Cup

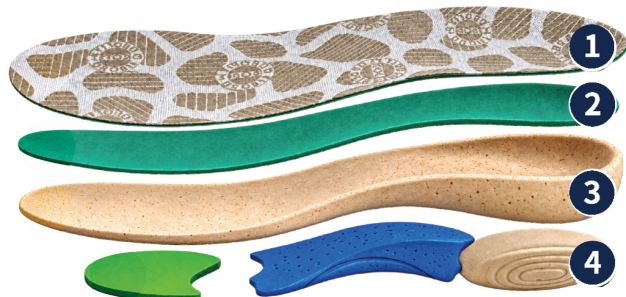

Pads support high-load areas such as the forefoot, arch and heel. A deep heel cup helps support your foot where it is needed for a stable, comfortable stride.

06 Four Layers of Impact Cushioning

Each step creates impact. The different materials absorb and distribute it to help reduce stress on your feet and knees and make walking more comfortable.

Comfort and freshness for everyday life, sports, work and travel.

Four materials. Comfortable, refreshing steps.

01 DEOFIT Fabric

Adsorbs and breaks down odor-causing substances while providing antibacterial performance to help keep shoes fresh. The silicone-printed pattern helps reduce foot slippage for a stable, comfortable fit.

02 OrthoLite (Sola Foam)

The first cushioning layer absorbs impact and remembers the shape of your foot. It helps provide a comfortable fit every time you put your shoes on.

03 Cork-Containing G-10 Fran Foam

A highly durable material that provides additional shock absorption and distribution. The cork-containing foam offers elasticity and resilience to help minimize compression and deformation during prolonged wear.

04 Asfire EVA + Firm EVA Arch Support

Shock-absorbing EVA and firm EVA arch support cushion and distribute impact where needed, including the forefoot, arch and heel, while helping stabilize the foot.

Lab-Tested Odor & Antibacterial Performance

ODOR
99%+
REDUCTION

Test gases: Acetic acid,
Ammonia

BACTERIA
99%+
REDUCTION

Test bacteria:
Klebsiella pneumoniae,
Staphylococcus aureus

* Results obtained under accredited laboratory test conditions.

PRODUCT INFORMATION

Product: Shoe insole | Model: SHINURBON INSOLE
 Materials: DEOFIT fabric / Sola Foam /
 G-10 Fran Foam / EVA
 Size / Manufacturing date: Indicated separately
 Manufacturer: Ejaen Co., Ltd. | Made in Korea
 Address: Unit 205, Retail Building 101,
 Yeonje Green Tower, 30, Geojecheon-ro 87beon-gil,
 Yeonje-gu, Busan, Republic of Korea
 Customer service: +82-51-744-7786

CARE & PRECAUTIONS

Use only for the intended purpose.
 Do not machine wash or tumble dry.
 Do not soak for extended periods.
 Air-dry in a well-ventilated, shaded place.
 Keep away from flames and high heat.
 Stop use if skin irritation occurs.
 Keep out of reach of children.

A better insole makes a better shoe.

CUT TO FIT

Trim only the toe for a better fit

Align the heels and adjust only the toe length. Do not cut the sides or heel.

For a better fit, first cut one size larger than your usual size, place it in your shoe, and check the fit.

01 Overlay Your Insole

Place your existing insole on top of SHINURBON and align the heels first.

02 Mark the Toe

Hold the stacked insoles in place and trace the toe outline.

03 Trim the Toe

Cut carefully along the marked line. Do not cut the sides or heel.

04 Check the Fit

Place it flat in your shoe. If the toe is tight, trim a little at a time and check again.
